Electrical Engineer

Undergraduate Researcher

Job Description
The Institute for Sensing and Imbedded Network Systems Engineering is looking for an undergraduate electrical engineer researcher to join a team looking to build a museum exhibit for the South Florida Science Center. The position is part of the I-SENSE engineering team and has the possibility of turning into a longer-term position.

Responsibilities
• Working on the design and implementation of an electronic control system for a drop test chamber
• Wiring and connection analysis
• Collecting and cleaning data
• Common responsibilities also include supporting the rapid prototyping capabilities of the lab

Other Preferred Knowledge/Skills
• PCB design and assembly
• Embedded Systems experience
• Arduino Programming

The ideal candidate will be a strong technical communicator and good team player with a desire to learn and grow.
